The version in effect today is always at <https://www.varsitypage.com/subprocessors>

Plain-language summary (not part of the binding text)

These are the outside companies that process personal information for Varsity Page: hosting, database and storage, background jobs, Google services for maps and AI features, PostHog for consent-based analytics, and PayPal for donations where a school offers them. We update this page, with a new version, when the list changes.

About This List

Varsity Page LLC uses the service providers below to operate the Varsity Page website and app. They process personal information on our behalf for the purposes listed. This list was last reviewed on October 3, 2026, against the services the Varsity Page app is built to use. How we use and share information is explained in our

[Privacy Policy](#)

.

VP Core, the administrative product schools use, is operated by Varsity Page LLC itself and is not a subprocessor. Information shared with a school through VP Core is described in the Privacy Policy.

Current Service Providers

Provider: Vercel

Purpose: Website and app hosting, content delivery, and approximate country lookup from IP address

Information involved: Requests to the Service, including IP address, device and browser details, and the content of pages and forms you submit

Provider: Supabase

Purpose: Database, sign-in, file storage and live updates

Information involved: Account and profile information, uploaded images, follows, notifications, contest entries, inquiries, donation records, AI chat history and usage events

Provider: Trigger.dev

Purpose: Scheduled and background jobs, such as sending inquiries and donation records to the school and cleaning up unused uploads

Information involved: The records each job processes, such as inquiries, donation records and upload references

Provider: Google Cloud (Gemini API, Vertex AI, Cloud Storage, Cloud Run)

Purpose: AI chat responses, and processing and storing files you add to AI features

Information involved: AI chat messages, attachments and conversation context

Provider: Google Maps Platform

Purpose: Embedded maps on venue pages

Information involved: IP address and browser details when a map loads

Provider: PostHog

Purpose: Product analytics, only after a cookie choice that allows it

Information involved: Usage information, browser and device details, a random account identifier for signed-in users, and error reports

Provider: PayPal

Purpose: Payment processing for donations, where a school offers them

Information involved: Payment details you enter with PayPal, the amount, and payment reference numbers

Varsity Page does not use these providers to sell personal information or to show targeted advertising.

Changes

When we add or replace a provider that processes personal information, we publish a new version of this page with a new version number and effective date. Earlier versions remain available in our [legal center](#).
